

Index to Volume 43 (1972)

This index is composed of the following three subindexes: (1) bibliographical, (2) author, and (3) topic. Entries in the bibliographical index are numbered and have been alphabetized by the last name of the author or, in the case of multiple authors, by the last name of the senior author. Reference information includes the name(s) of the author(s), the title of the article, the month of publication, and the page on which it is found.

The author index cites the name of each author, followed by the month of publication and page(s) on which the article(s) begin.

In the topic index, each article is listed under those important topics about which the article provides information and/or data. The number or numbers included in the listing refer to the initial page of the article in which the topic is discussed.

I. Bibliographical Index

1. BAUMGARTNER, TED A., and ZUIDEMA, MARVIN A. Factor analysis of physical fitness tests. Dec. 443.
2. BELZER, JR., E. G., and PETERS, BRIAN. Effects of a gross motor activity on recovery from a reactive inhibition in a rotary pursuit task. May 125.
3. BERLIN, PEARL, and GENTILE, A. M. Foreword to *Skill Learning and Performance*. Oct. 263.
4. BEVAN, RANDALL J. A simple camera synchronizer for combined cinematography and electromyographic kinesiology for use with a pen recorder. Mar. 105.
5. BOBO, MICHAEL W. Effects of alcohol upon maximum oxygen uptake, lung ventilation, and heart rate. Mar. 1.
6. BOWIE, WILLIAM, and CUMMING, GORDON R. Sustained handgrip in boys and girls: Variation and correlation with performance and motivation to train. May 131.
7. CAMPBELL, DONALD E., and FOSTER, ROY A. Health knowledge of young adults from two socioeconomic levels. Dec. 399.
8. CORBIN, CHARLES B. Relationships between physical working capacity and running performances of young boys. May 235.
9. DARDEN, ELLINGTON. A comparison of body image and self-concept variables among various sports groups. Mar. 7.
10. DARDEN, ELLINGTON. Sixteen personality factor profiles of competitive bodybuilders and weightlifters. May 142.
11. DARDEN, ELLINGTON, and SHAPPELL, RICHARD T. Performance by males and females on three motor tasks under standard and mirror reversal conditions. Dec. 460.
12. DEL REY, PATRICIA. A target device to measure speed and accuracy in an open and closed environment. May 239.
13. DOTSON, CHARLES O., and STANLEY, W. J. Values of physical activity perceived by male university students. May 148.
14. FLYNN, RICHARD B. Numerical performance as a function of prior exercise and aerobic capacity for elementary school boys. Mar. 16.

III. Topic Index

Each topic is followed by the initial page number(s) of the article(s) in which the topic is discussed.

A

accuracy of motor skill ratings; 55
 acquisition of motor skill, as influenced
 by precision of information feedback;
 489
 aerobic capacity, effects of alcohol on;
 1
 effects on numerical performance; 16
 aesthetic experience, as motivation for
 physical activity; 148
 alcohol, effects on aerobic capacity; 1
 effects on heart rate; 1, 94
 effects on lung ventilation; 1
 effects on oxygen consumption; 1, 94
 ANOVA: use in estimating generality
 and specificity; 494
 ascetic experience, as motivation for
 physical activity; 148
 Astrand-Ryhming test; 89
 athletes, strength and isotonic endurance
 of elbow flexors of; 82

B

baseball players, body image and self-
 concept of; 7
 basketball players, body image and self-
 concept of; 7
 behavior and space utilization of
 children; 47
 Bender Visual-Motor Gestalt Test; 47
 bodybuilders, personality factor
 profiles; 142
 body image of athletes; 7

C

camera synchronizer; 105
 carbon dioxide production, effects of
 treadmill exercise on; 175
 cardiorespiratory and body composition
 measurements of high school football
 players; 472
 catharsis, as motivation for physical
 activity; 148
 children, behavior and space utilization;
 47
 children's motor performance; 187

children with learning difficulties,
 response strategies in; 509
 cinephotography techniques; 105
 correlational methods, comparison of,
 reply to Schutz's critique of; 507
 correlational methods, mathematical vs.
 empirical methodology; 501
 cybernetic model; 312
 cybernetic view of performance; 295

D

dehydration, effects on physical working
 capacity of wrestlers under competi-
 tive conditions; 416

E

electromyographic kinesiology; 39, 105
 empirical methodology, use as
 correlational method; 501
 endurance, isotonic; 82
 endurance performance, reliability,
 individual differences and intra-
 variation of; 31
 effects of feedback on; 39
 ergometer, bicycle; 31, 89
 estimation of generality and specificity,
 by squared correlation; 494
 by ANOVA; 494
 exercise, effects on numerical
 performance; 16
 experimenter sex, effects on children's
 motor performance; 187

F

factor analysis of physical fitness
 tests; 443
 feedback, effect on endurance; 39
 football players, body image and self-
 concept of; 7
 force plates, use for long jump
 studies; 247

G

goal attainment process; 337
 gymnasts, body image and self-
 concept of; 7

H

- handgrip, sustained; 131
- strength, as related to tonic neck reflex; 157
- handgrip time, related to motivation to train; 131
- heart rate, effects of alcohol on; 1, 94
- palpation technique of determining; 77
- training, estimation of; 77
- effects of treadmill exercise on; 175
- health knowledge of young adults; 399

I

- information processing; 295, 362
- analysis of inputs; 295
- decision-making; 295
- isometric contraction, effects of feedback on; 39

J

- junior high school boys, self-concept of; 208

K

- kinesiology, electromyographic; 105

L

- leg power, absolute and relative, as predictors of physical performance; 468
- long jump studies, use of force plates for; 247
- lung ventilation, effects of alcohol on; 1
- effects of treadmill exercise on; 175

M

- mathematical methodology, use as correlational method; 501
- mirror reversal conditions, effects on performance of motor tasks; 460
- money, effects on motor learning and performance; 429
- motor performance; 387
- motor skill, ratings of; 55
- movement analysis; 312
- movement behavior research, Moving Embedded Figures Test; 479
- Moving Embedded Figures Test, use in movement behavior research; 479

N**O**

- optimum angle of projection for racing start in swimming; 167
- oxygen consumption, effects of alcohol on; 1, 94
- prediction of; 89
- calculation of; 121
- effects of treadmill exercise on; 175

P

- pain, tolerance of; 39
- perceptual-motor skill performance, systems-analysis of; 266
- performance on motor tasks under standard and mirror reversal conditions; 460
- physical activity, attitude of male university students toward; 148
- physical characteristics of college age women gymnasts; 226
- physical education skills, integration with the concept of levers; 423
- physical fitness tests, factor analysis of; 443
- physical performance, as predicted by absolute and relative leg power; 468
- physical working capacity and running performance for young boys; 235
- praise, effects on motor learning and performance; 429
- precision of information feedback, effects upon acquisition of motor skill; 489

Q**R**

- racing start in swimming, optimum angle of projection; 167
- reactive inhibition in a rotary pursuit task; 125
- recovery from reactive inhibition, effects of gross motor activity on; 125
- residential affiliation, as determinant of team cohesiveness; 62
- respiratory quotient, calculation of; 121
- response strategies in children with learning difficulties; 509
- rhythm, auditory and visual perception of; 197

rotary pursuit task, reactive inhibition
in; 125
running; 89
running performance and physical
working capacity of young boys; 235

S

selection of fifteen-minutes work load on
a treadmill and bicycle; 451
selection of work effort on treadmill and
bicycle, physiological variables
related to; 216
self-concept of athletes; 7
of junior high school boys; 208
skill, definitions of; 266, 337
skill learning and performance; 263,
266, 295, 312, 337, 362, 394
implications for physical education;
374, 387
social reinforcement, effects on
children's motor performance; 187
space utilization by children; 47
sports abilities as contributors to self-
concept of junior high school boys; 208
sports interests as contributors to self-
concept in junior high school boys;
208
squared correlation, use in estimating
generality and specificity; 494
statistical tests, validity of; 23
of student improvement; 113
strength, isometric; 82
subject sex, effects on children's motor
performance; 187
success, as determinant of team
cohesiveness; 62
swimmers, body image and self-concept
of; 7
swimming, racing start in; 167

T

target device to measure speed and
accuracy of open and closed
environment; 239
task analysis; 362
team cohesiveness, effects of success
and residential affiliation on; 62
tennis, rating of skill; 55
